## **DETAILED ACTION**

Examiner acknowledges receipt of the RCE filed with the amendment on 5/23/05. According to the amendment, claims 1-16 are pending in the application.

## Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hand et al (US 2004/0238319).

As per claim 1 and 3, Hand discloses a gaming system comprising two gaming components (enhanced bezel and validator); each gaming component comprises a controller (paragraphs 0027-0028), a communication interface and a communication link (Fig. 4; paragraphs 0026 and 0032). Hand does not explicitly disclose allowing the controllers of the gaming components to communicate peer to peer with other controllers of other gaming components. However, Hand discloses the capability of transferring data directly between the components without a master controller to control the communications

(lines 7-9 of paragraph 0027 and paragraph 0032). Further, allowing communications on a peer-to-peer basis on different modules would have been well known to a person of ordinary skill in the art at the time the invention was made. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to allow communication between controllers of Hand on a peer-to-peer basis in order to facilitate direct communications between controllers.

As per claim 2, Hand discloses a game processing unit (paragraph 0020).

As per claim 4, Hand discloses a bill validator (paragraph 0022).

As per claim 5-6, Hand discloses a link for transferring data between the bill acceptor and the enhanced bezel (paragraph 0027).

As per claim 7, Hand discloses a second communication link for communication between the components in the cabinet and components outside the cabinet (Fig. 4; paragraphs 0031-0032).

As per claim 8-10, adding or removing a component while power is on; providing power to a game component, and using IEEE 1394 link would have been well known to a person of ordinary skill in the art at the time the invention was made.

As per claim 11 and 13, refer to discussion in claim 1 above. Further, Hand discloses a gaming component located outside the cabinet (PDA or portable computer 100 in Fig. 4); an exterior communications link for allowing

Application/Control Number: 10/615,732 Page 4

Art Unit: 3713

the gaming components in the cabinet to communicate with the gaming component outside the cabinet (Fig. 4; paragraphs 0031-0032); and a bridge 90 (Fig. 4) (interface board to outside world). Hand does not explicitly disclose arranging the gaming components for communicating with other gaming components in a peer-to-peer fashion without a host. However, Fig. 4 discloses at least two components 12 and 92 communicated directly without a host (paragraphs 0027 and 0032). Hand further discloses that the gaming components can be connected to each other (Fig. 4). Hand obviously encompasses the obviousness of connecting the gaming components to each other peer-to-peer in order to facilitate direct connection between the components.

As per claim 12 and 14-16, implementing a game processing unit to gaming components, using IEEE 1394 back plane or cable communication bus, and providing power to an external device would have been well known to a person of ordinary skill in the art at the time the invention was made.

## Response to Arguments

3. Applicant's arguments on 5/23/05 have been considered but are most in view of the new ground(s) of rejection.

Application/Control Number: 10/615,732

Art Unit: 3713

4. Any inquiry concerning this communication or earlier communications

from the examiner should be directed to Kim Nguyen whose telephone number

is 571-272-4441. The examiner can normally be reached on Monday-Thursday

during business hours.

If attempts to reach the examiner by telephone are unsuccessful, the

examiner's supervisor, Xuan Thai, can be reached on 571-272-7147. The

central official fax number for the organization where this application or

proceeding is assigned is 571-273-8300.
